Software Engineering Undergraduate | Full-Stack & Mobile Developer

PROFESSIONAL SUMMARY

Motivated and detail-oriented Software Engineering undergraduate with hands-on experience designing and developing full-stack web and mobile applications. Skilled in building secure systems using modern JavaScript frameworks, relational and NoSQL databases, responsive interfaces, and RESTful APIs. Experienced in implementing robust user authentication, multi-model production logic, and production-ready deployments. Passionate about solving real-world financial and enterprise problems while actively training to incorporate cloud architectures into production development workflows.

TECHNICAL SKILLS

Programming	JavaScript, SQL, Python, Dart, HTML5, CSS3
Frontend	React, Vite, Flutter, Tailwind CSS
Backend & DB	Node.js, Express.js, Supabase, PostgreSQL, FastAPI, MongoDB, MongoDB Atlas
Real-Time & DevOps	Socket.IO, Docker, Git, GitHub, Vercel
Core Competencies	RESTful API Design, Relational Database Modeling, JWT Authentication & Role-Based Access Control (RBAC), Secure Password Hashing (bcrypt), Mobile-First Responsive Design, Software Testing & Debugging

PROJECTS

WeFund – Crowdfunding & Financial Technology Platform (Ongoing)

Lead Backend Engineer | Personal Project — Technologies: Node.js, Express.js, Supabase, PostgreSQL/SQL, Multi-Model AI Orchestration, Git, GitHub

- Designing and engineering the scalable backend architecture and transactional processing systems for a robust crowdfunding platform.
- Optimizing high-integrity relational database schemas, foreign key constraints, and performance-tuned data-fetching logic using Supabase SQL.
- Coordinating an advanced multi-model AI software development workflow (Gemini, ChatGPT, DeepSeek) to build, test, and cross-verify application layers.
- Implementing secure transaction auditing mechanisms specifically designed for financial ledger accuracy and data persistence.

Elevate (Emplora) – Full-Stack Recruitment Platform

Lead Full-Stack Developer | Personal Project — Technologies: React, Vite, Node.js, Express.js, MongoDB Atlas, Tailwind CSS, Socket.IO, Docker, Vercel

- Designed and developed a decoupled full-stack architecture connecting employers and job seekers.
- Implemented secure JWT authentication with role-based access control (RBAC) for diverse user tiers.
- Developed robust real-time messaging systems and cross-platform notification pipelines utilizing Socket.IO.
- Integrated seamless resume upload workflows, client dashboards, and automated application tracking pipelines.
- Established an optimized deployment pipeline utilizing containerized Docker testing and automated Vercel webhooks.

CAFAD – Vehicle Maintenance & Fault Diagnosis Application

Full-Stack Developer | Academic Project — Technologies: Flutter, FastAPI, MongoDB

- Designed and developed a responsive mobile client using Flutter to simplify mechanical consultations and maintenance tracking.
- Built scalable backend APIs with FastAPI to systematically organize high-volume vehicle fault diagnosis records.
- Implemented real-time status reporting mechanisms ensuring live sync for maintenance milestones.

MATLAB/Simulink Control Systems Simulation

Technical Research Project

- Modeled and analyzed complex PID control loops using MATLAB and Simulink.
- Applied experimental Ziegler-Nichols tuning methods to resolve controller parameters and evaluate system loop stability.

EDUCATION

Bachelor of Engineering (B.Eng.) in Software Engineering

University of Buea | Matricule: FE23A031 | Expected 2027 | Level 400 (Entering Level 500 upcoming semester)

Relevant Coursework: Software Engineering, Database Management Systems, Distributed Systems, Object-Oriented Programming, System Design & Architecture, Computer Networks

CERTIFICATIONS

- Fundamentals of Predictive Project Management – PMI (Dec 2024)
- Data Analytics Essentials – Cisco (Nov 2024)
- Python Essentials 1 & 2 – Cisco (Nov 2024)
- AWS Certified Cloud Practitioner (In Progress)

SOFT SKILLS & INFO

- Problem Solving & Analytical Thinking
- Team Collaboration & Communication
- Adaptability & Continuous Learning
- Attention to Detail & Time Management

Languages: English (Fluent)
